

Two New California Air Resources Board Solicitations Announced

CALSTART Invites Expressions of Interest in Partnering

DATE: JUNE 24, 2015

TO: CALSTART MEMBERS

The California Air Resources Board (ARB) is pleased to announce its Grant Solicitation for the Zero-Emission Drayage Truck Demonstration Project and the Multi-Source Facility Demonstration Project. Up to \$23,658,500 is available for each of these solicitations. CALSTART has played an active role in providing feedback and guidance to ARB as these were shaped.

Projects funded under the **Zero-Emission Drayage Truck** solicitation will demonstrate full zero-emission drayage trucks, and drayage trucks that offer zero-emission miles (near zero-emission) by employing on-board range extending internal combustion engines or other technologies.

California-based public agencies such as air districts, ports, and local government entities or agencies and California-based non-profit organizations with expertise implementing large scale advanced technology demonstrations and requisite knowledge of drayage truck operations may apply via this solicitation to become the demonstration project Grantee(s). Applications are due to ARB by 5:00 p.m., September 24, 2015.

Projects funded under the **Multi-Source Facility Demonstration Project** are intended to demonstrate multiple types of equipment and vehicles employing zero and near zero-emission technologies at one freight facility located within, or with the project directly benefitting, disadvantaged communities. Examples of multi-source facilities include distribution centers, warehouses, ports, intermodal rail yards, or other similar freight support facilities.

California-based public agencies such as air districts, ports, or local government entities or agencies and California-based non-profit organizations with expertise implementing large scale advanced technology demonstrations may apply for this Solicitation to become the demonstration project Grantee(s). Applications are due to ARB by 5:00 p.m., September 24, 2015.

CALSTART is and will be working with partners to help shape and take part in high-quality, competitive projects. We have been in discussions with co-funders and others to help build strong teams. We are open to discussing project and team concepts with members and potentially taking part in ways that can drive real commercial outcomes. If you are interested in potentially partnering with us, please **contact Mike Ippoliti at mippoliti@calstart.org for inquiries related to the Zero-Emission Drayage Project** and

Jasna Tomic at jtomic@calstart.org for the Multi-Source Facility Demonstration Project.

[Please download and read the Solicitations](#) – there are specific requirements for technologies, a 25% match funding requirement, and other essential responsibilities.

For more information

Zero-Emission Drayage Truck Demonstration Project

ARB will hold a workshop and teleconference for applicants on July 16, 2015 Time: 10:00 a.m. to 12:00 p.m. (Pacific) Place: Cal/EPA Headquarters Conference Room 710 1001 I Street, Sacramento, California 95814 Teleconference Information: Call-in Phone Number: 800-593-0695 Passcode: 37043

Multi-Source Facility Demonstration Project

ARB will hold a teleconference for applicants on July 21, 2015 Time: 10:00 a.m. to 12:00 p.m. (Pacific) Call-in Phone Number: 888-324-7812 Passcode: 5319314
