

The City of Columbus teams up with MEMA Ohio, in an effort to bring regional training to our Fire Technicians. The training lasted for one week on site involving 22 Technicians. The EVT instructor, Al Conkle of Fire Tech Support trained his students on **F1- Maintenance, Inspection, and Testing of Fire Apparatus**, **F2-Design and Performance Standards of Fire Apparatus**, and **F3-Fire Pumps and Accessories** from the nationally recognized Emergency Vehicle Technician Program. The training included both classroom and “hands-on” training at the Columbus facility. While the City of Columbus filled their minds with technical knowledge and skill, MEMA fed their bellies with lunch daily. The training was open to all MEMA members and their employees at no cost – this collaborative effort demonstrates the importance and commitment of training to our technicians.

The Columbus Fleet Management Division remains a top Leading Fleet and is an ASE Blue Seal recognized facility in its 8th year. Columbus holds over 100 EVT certifications with 10 Master EVT certifications currently on the floor.
